

I recently had an SEO review done for my business site, and honestly, it was such a great experience. Tina broke everything down in a way that was super easy to understand—no confusing jargon, just clear explanations of what each suggestion meant, why it mattered for my business and she even gave me suggestions on how to make these changes myself.

The review itself was really thorough. It was obvious Tina had taken the time to understand what I do and what I'm aiming for. The advice I got was practical and easy to act on, which made me feel way more confident about making changes to my site without feeling overwhelmed by all the tech stuff.

The changes from this review have made an impact already, I now have a website that is fresh, and functions as I need it to.

If you're a small business owner and SEO makes your head spin, I can't recommend Tina enough. Super approachable, really knows her stuff, and genuinely wants to help.
